NEXUS ISR PRESENTS AT DIGITAL COMMUNICATION CONFERENCE

ROCHESTER, NY,: Evhen Tupis, Director of Engineering, has been invited to speak at the TAPR National Digital Communication Conference (DCC) in Hartford CT. His presentation is titled, "Growing APRS's Value within the Emergency First Responder Community".

The session will focus on the services that well-trained and prepared private citizens can provide to emergency first responders, while maintaining a safe distance from an incident. With this audience of Amateur Radio operators, he will focus on the value that their telemetry (via their Automated Position Reporting System [APRS™]) can bring to Incident Commanders - based upon first-person interviews with Emergency First Responders.

The group will be given a preview of a product-in-development that is designed to aggregate many sources of telemetric data (e.g. - real-time weather telemetry, hazmat telemetry, river/flooding telemetry, etc.) for display by Emergency Operations personnel.
