FOR IMMEDIATE RELEASE
May 2008

CONSTRUCTIONCAM.COM USES NEXUS ISR'S NEXUS HAWK™ TO STREAM LIVE VIDEO OF CHARITY BOXING EVENT

Chicago, IL and ROCHESTER, NY: Recently, Real Estate Brokers in the Chicago area came together in support of *The Box It Foundation*, generating \$369,000 in donations to the national *Make a Wish Foundation*. Their generosity got them into the ring, ConstructionCam.com captured it on video and the Nexus Hawk™ transported it to over 1400 live-viewers on the Internet, despite lack of high-speed cabled Internet access at the event!

Mark Carroll, President for Construction Cam says, "We use the Nexus Hawk for our surveillance solution in the field which provides live video for contractors to deter construction theft. This was an easy way to deliver the broadcast to those who could not attend in person."

About Nexus iSR

~ MORE ~

Nexus iSR, LLC is a Rochester NY based high-technology engineering and manufacturing company, specializing in providing information securely and reliably across public and private wireless broadband networks, satellite circuits and cabled networks. Its flagship product, the Nexus Hawk™ mobile router/gateway, can provide secure, fail-over connectivity across multiple networks including those mobile wireless broadband services sold by AT&T, Sprint, Verizon, BGAN satellite circuits and private EVDO and HSDPA networks.

About ConstructionCam.com

ConstructionCam.com is a full-service jobsite monitoring and surveillance solution. Our motto is "you just tell us when and where and we'll do the rest." We can hard-mount cameras to existing buildings using a non-penetrating mount or we can deliver one of our self-contained; in regards to power and communications, using one of our ConstructionCam Trailers. The trailer takes less than five (5) minutes to setup and it can be moved throughout the project. We offer monitoring solutions via our customized website application, which allows users to see live video via a full-color pan/tilt/zoom camera, as well as have access to still images or time-lapse videos through any browser. We also offer fully customized security solutions from basic motion detection to invisible fences that sound an alarm, document the security breach and alert the proper authorities.
