

The NEXUS HAWK™ from Nexus iSR is a state-of-the-art internetworking device that provides instant access to important information across more geography, including areas with poor municipal reception.

GAIN ACCESS TO THE INFORMATION YOU NEED WHEN AND WHERE YOU NEED IT

The NEXUS HAWK automatically connects laptops, tablets and PDAs to:

- Cellular
- WiFi 802.11 a/b/g
- Future networks such as WiMAX and UWB

Whether you're at the command post, in the patrol car or serving in a tactical capacity or administrative role, the NEXUS HAWK uses the widest range of wireless and wired networks available to deliver sensitive information to you in an instant.

Nexus iSR DATA COMMUNICATIONS
ANY NETWORK. ANYTIME. ANYWHERE.

The NEXUS HAWK provides:

COMMAND POSTS

- Officer safety and accountability.
- Secure remote voice, video and data feedback to Emergency Command Centers.
- Capability to access online databases and directions.
- Geographical location of patrol units.
- Timely review of reports.

PATROL UNITS

- Officer safety and accountability of location.
- Job assignment with complete history.
- Field access to mug shots and fingerprints.
- Automated "live" field reporting.
- Live accident reporting with GPS coordinates.
- Access to administrative DMV, county, property and pistol permit records.

TACTICAL

- Live maps for serving warrants and locating suspects plus barricade information.
- Public records to help identify occupants living at a specific address and surrounding neighbors.

- Real-time high-resolution images for transferring photos as well as live video to headquarters and command posts and live video from banks and schools.
- Contact information that provides a complete call history and makes it easier to locate contacts and associates.

ADMINISTRATION

- Management of computer resources, software updates and asset management.
- High-speed transfer of files to the field.
- Access to network resources and servers.

INFORMATION TECHNOLOGY ADMINISTRATION

- A remote help desk.
- Automatic software and firmware updates.
- Remotely monitor and audit for illegal software and supports the prevention of piracy.
- Increased productivity in the field and IT department.

Improved first response. Improved first responder connectivity.

As you can see, the NEXUS HAWK provides a more efficient way to run your department by helping you to better utilize your time and resources. This exciting new technology is substantially faster and more secure than the most current law enforcement legacy networks. Plus, it offers broader coverage, broadband connectivity to any available network and, most importantly, enhanced officer safety and accountability. The end result: greater success in completing all of your missions...safely and accurately.
