FOR IMMEDIATE RELEASE  
February 2008

## **NEXUS ISR AND ENTRÉE WIRELESS ANNOUNCE STRATEGIC ALLIANCE**

CARDIFF, CA and ROCHESTER, NY: Entrée Wireless, originator of the Warrior Portable 'Hotspot in a Box' and Nexus iSR, LLC, experts in the field of mobile wireless solutions, introduce the Nexus Hawk as a supported option for the Entrée Wireless suite of products.

Partnered with Entrée Wireless, the "Nexus Hawk, Warrior Portable Hotspot in a Box" is a ruggedized battery powered all-in-one device designed to bring portability to a variety of communication devices in emergency response or temporary applications with limited or intermittent AC power. The Nexus Hawk is the driving force for the WiFi and GPS applications within the box. The Nexus Hawk, with two PCMCIA ports, can also provide operators redundancy and fail-over capability not previously available.

Gary Boone, a spokesperson for Nexus iSR says, "Uptime is a necessity for mission critical situations. If a user moves out of range of one carrier network, the Nexus Hawk can quickly failover to the alternate carrier."

David Ahlgren, President Entrée Wireless says, "Many of our customers have asked for the increase reliability that is provided by dual 3G feature of Nexus Hawk."

About Nexus iSR: Nexus iSR, LLC is a Rochester NY based high-technology engineering and manufacturing company, specializing in providing information securely and reliably across public and private wireless broadband networks, satellite circuits and cabled networks. Its flagship product, the Nexus Hawk™ mobile router / gateway, can provide secure, fail-over connectivity across multiple networks including those mobile wireless broadband services sold by AT&T, Sprint, Verizon, BGAN satellite circuits and private EVDO and HSDPA networks.
