NEXUS HAWK MOBILE ROUTER FOR PUBLIC SAFETY FIPS 140-2

ROCHESTER, NY: Nexus iSR, LLC - The Nexus Hawk mobile router incorporates the National Institute of Standards and Technology (NIST) FIPS 140-2. This NIST Standard is available on all Nexus Hawks.

Nexus takes into account public safety and other homeland security requirements for secure data transmissions that may require this standard at the federal, state and local level. For example most state criminal justice agencies require FIPS 140-2 for NCIC transmissions.

The Nexus Hawk Cellular advanced router contains an embedded FIPS 140-2 compliant module. "The Nexus Hawk was originally designed and tested for public safety communication's needs ensuring FIPS 140-2 security." said Ret Lt Mike Kozak, Public Safety SME. "In essence a device created by Cops for Cops"

In regard to FIPS 140-2, Mr. Kozak noted, "A defense in depth approach is natively supported by deploying the Nexus Hawk. It gives public safety operations peace of mind with end to end standards based encryption for interoperable communications regardless of the protocol."

About Nexus iSR, LLC - Manufacturer of highly secure mobile routers for the demanding mobile worker that requires solutions that are clearly superior to cellular data cards and data services alone.
